Experience

Allen Digital **July 2024 - Present**
Senior Business Analyst *Bengaluru*

- Directed a validation initiative for 298K NEET/JEE questions to address low-quality, unserviceable content in the 5M+ question bank, improving classification precision by 20% and enabling clearer communication with academic teams.
- Architected seven distinct audit-compliant data models within AWS QuickSight, improving data accuracy by 15%, enabling faster validation by EY and boosting stakeholder satisfaction by 30%.
- Developed interactive AWS QuickSight dashboards for Topic/Subtopic performance and Strength & Weakness analysis with peer benchmarking across zones and batches, delivering actionable insights that drove a 29% increase in student engagement and informed strategic decisions.
- Spearheaded an AI-powered hint generation pipeline utilizing LLMs for context-driven student guidance, automating questions and establishing framework for scaled question bank, enhancing assessment experience.
- Designed scalable data models for a new product - Eureka, enabling granular tracking of student progress, content consumption, and assessment behavior to power core product features.
- Partnered with product and engineering to define data contracts and event schemas for Eureka's analytics layer, enabling self-serve reporting at launch.
- Developed and implemented the core data architecture for a student performance analysis product, empowering granular tracking of progress and assessment behavior for 3L+ students.
- Championed a strategic initiative to transition more than 3L+ students to the new test performance analysis platform, accelerating the company's tech-enabled future vision.
- Built CXO-facing Faculty Utilization analyzing data across 7K+ faculty to identify cost-optimization opportunities during IPO preparation, supporting initiatives that contributed to 250Cr in savings.

Allen Digital **January 2024 - June 2024**
Business Analyst Intern *Bengaluru*

- Designed an algorithm backtesting framework for personalized quizzes, increasing model accuracy by 15% through ROI comparisons with product managers.
- Reduced data discrepancy resolution time by 60% by building AWS QuickSight dashboards for streamlined ETL pipeline monitoring

NTPC **June 2023 - July 2023**
Analyst *Noida*

- Spearheaded the development of a database management system using C# and SQL; collaborated with multiple teams to automate document storage and access, improving workflow efficiency by 30%.

Education

Manipal Institute Of Technology, Manipal **August 2020 - July 2024**
B.Tech. in Information Technology *CGPA - 7.8/10*
